Public Enemy # 1

in the pay-TV and

cable worlds!

"OUTRAGEOUS!!!" (Kenny Schaffer, TV2Me: New York)

Everything he ever wrote, everyone he ever pissed off - on DVD!

The saga began in October 1975 when CATJ (Community Antenna Television Journal) revealed the technical details of the September 30 launch of "HBO via satellite". From 1975 through 1979, CATJ - edited by "Coop" - was the number one source in the world for satellite TV technical and operational information. Nobody else even came close.

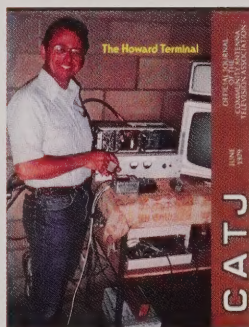

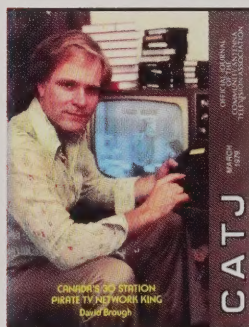

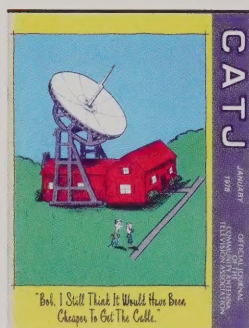

By 1977, "Coop" had been granted a FCC license for an experimental "TVRO terminal" (Yes - in those days each receiving dish required a FCC license!) - and assigned "Call Letters" (WF-92 - only the FCC would think to assign 'Call Letters' to a non transmitting terminal!).

In March 1978 he was demonstrating high quality reception on both 6 and 10 foot dishes - at a time when cable was continuing to favor 30 foot monster dishes.

In 1979, "private" (unlicensed - who the hell needs a

license?) dishes were sprouting in yards all over America and Canada; the revolution had begun. And CATJ would follow it

development by development until the launch of the "real" home dish magazine: "CSD".

CSD, perhaps the most unconventional, irreverent telecommunications magazine in the history of radio and TV! Man oh man did it piss people off. From the Motion Picture barons in Hollywood and the network execs in New York to the Governments of Australia, South Africa and Saudi Arabia - CSD was "poison". By revealing that folks could enjoy home dish TV without paying anyone (beyond the cost of the dish system), CSD turned the American "satellite revolution" into an "international game plan". The world went "satellite TV crazy" and CSD told you what to do, how to do it, using which piece of equipment - worldwide.

And then there was scrambling.

M/A Com Videocipher scrambling to be specific (forget the Oak Orion system - a total farce as CSD revealed).

Videocipher "2" was flawed and CSD knew this to be true. Hacking (piracy) of Videocipher began in the fall of 1986 and CSD covered it in detail, much to the embarrassment of the folks at M/A Com which lead to the January 1987 "Videocipher Seminars" held on Providenciales in the Turks & Caicos Islands.

Several lawyers sent their children to university with the fees they 'earned' on this one. Boresight's

Shaun Kenny had a field day reporting the saga on TV weekly and Keith Lamonica brought his radio talk show troops to the battle.

Fascinating stuff, the real story, truthfully revealed for the first time!

HOW TO BE A "PIONEER" IN COOP'S SATELLITE ARMY!

Order your choice of the **REAL** "C-band" story here.

ONLY 500 DVD pre-release copies available. The real "unpurged" (may not all make it "to print!") version written "from the heart" by Cooper. Requires Acrobat reader (free from www.adobe.com) to access on your PC. The original unpurged, unedited text as it was written before "clean up" by attorneys and other legal scumbags.

500 DVD "Raw Copies" of Coop's original words, before the "*we can't let you say this!*", scumbag attorneys at the publishing company get their grubby hands on the text. Did Ted Turner offer \$1,000,000 to a well known NBC news person, "*If you will sire me a son*"? He did, as the DVD will reveal. And much-much more too personal to escape the "editing pencil" of the hard copy publishers! It gets better - much better. Each individual ordering a copy of the **"VIDEO PIRATES DVD"** will **also receive** an advance copy of the hard copy version when released. No extra charge!

HOW TO ORDER:

You have two choices. In both options, you will NOT be charged (credit card orders ONLY - and ONLY Visa and Mastercard) until the order is ready to be shipped.

OPTION ONE: 250 copies of **"VIDEO PIRATES DVD"** have been assigned to DMS International Inc. Using the form on the reverse side, you may order your copy. DVDs will be shipped to you directly from Coop (in New Zealand).

OPTION TWO: An additional 250 copies (all 500 will be autographed by Coop) are available from Far North Cablevision, Ltd. (Coop's company in New Zealand), also shipped to you via airmail from New Zealand and charged only when your shipment is ready to be sent.

AND - it gets even better than this!

Several other DVD/CD products, covering the history of TVRO and the much broader history of the development of TV broadcasting, are also available - some for immediate shipment!

See order form (over, please)

ORDERING:

The steps to have your personal copies of Coop's TRUE disclosures!

NOBODY will be charged ANY money on their credit card until the shipment is ready to go. IF you order items available for INSTANT shipment AND delayed shipment, only the instant will be charged; initially. Plus - you are dealing with Coop (and unless you work for M/A Com or GI, you are safe!).
